Cornfield Annual Mix Standard MAS-CWF1

Quick Overview

- Standard cornfield annual mix.
- Sow in fertile conditions.
- Five species includes Poppy

- Sow at 2.0 grams per square metre

Description

CWF1 Cornfield Annuals 100% Wild Flower Native British Seed mixture

This is our standard corn field annual seed mix.

The application rate is 2.0 grams per square metre or yard.

These mixes do best sown in fertile conditions. The red poppy, blue cornflower, purple corn cockle and yellow corn marigold can make for a very striking effect.

Please note all the wild flower seed in our mixtures are sourced and processed as follows. They come originally from stock grown in the wild in the UK. They are then multiplied up commercially. The seed is packed, mixed and distributed from the UK. This way you can be confident that you are buying native UK Wild Flower Seed to produce Native UK Wild Flower Meadows.
